Egypt - Cairo

Front-End Developer specializing in React and Next.js, focused on creating responsive, maintainable, and high-performance user interfaces. Strong foundation in JavaScript and TypeScript, with a passion for clean architecture and continuous improvement.

Experience

Skills

Pixel-Perfect Implementation: Translating designs into precise, responsive user interfaces that match layout, spacing, and typography exactly.

Reusable Components: Designing modular UI components that can be reused across the application to improve consistency and maintainability.

Documentation: Writing clear inline documentation to explain functions, components, and data structures for better readability and collaboration.

REST APIs: Consuming and integrating RESTful services to fetch, send, and manage data between the frontend and backend.

Accessibility (WCAG, ARIA, A11y): Building inclusive user interfaces that follow accessibility standards and support assistive technologies.

SEO Basics: Optimizing pages for search engines using proper structure, metadata, and performance best practices.

Semantic HTML: Using meaningful HTML elements to improve accessibility, SEO, and overall document structure.

Projects

Taqdimak • [↗](#)

It is a website that facilitates university applications for students, whether for fully or partially funded scholarships. The website supports both Arabic and English languages smoothly and features an elegant and attractive design.

VortexGaming • [↗](#)

VortexGaming is a modern web-based gaming platform designed to showcase interactive experiences with a sleek and dynamic UI

Al-Safwa "Design" • [↗](#)

A stylish design for a plastic products sales website that is responsive across different screen sizes.

LNR • [↗](#)

The LNR site is a full-service moving company platform designed to make relocations simple and stress-free.

Languages

English "B1 - B2" - Conversational

Certificates

Introduction to Software Engineering from IBM

September 2025 • [↗](#)

Explain the principles of software engineering, the Software Development Life Cycle (SDLC), and software development tools, technologies, and stacks

Linux Commands and Shell Scripting from IBM

October 2025 • [↗](#)

Master Linux fundamentals: architecture, distributions, software management, Bash commands, shell scripting, and cron scheduling.

Back-End Apps with Node.js and Express from IBM

December 2025 • [↗](#)

Build Node.js server apps with Express, manage packages via npm, and handle async operations using callbacks and promises.

Git and GitHub from IBM

September 2025 • [↗](#)

Use version control for collaborative coding and DevOps, manage repos/branches, perform PRs and merges, and showcase open-source projects in your portfolio.
